

PORTABLE SERIES

DVR Portable & Central Packaged Vacuums

Smooth & Quiet with 99.9% Filtration

- Filters so good they last years, not months. Low, low cost of ownership.
- Triple filtration assures trouble-free operation even with super-fine powder.
- Heavy duty construction will hold up to anything you throw at it.

Take control of moderately dense, fine powders with a Portable DVR portable vacuum by DuroVac.

Designed with filters so good you'll never have a drop in performance as you vacuum, even with fines that plug other vacuums. Now you can vacuum continuously without stopping work to clean filters.

And like all our portables, the DVR easily upgrades to HEPA certification.

The DuroVac DVR makes an ideal compact central vacuum system.

TRIPLE FILTRATION means hassle-free operation when you're handling fine powders. At 99.9% efficiency, the primary filter media won't easily clog, so performance never drops as the hopper fills. Vacuum continuously without stopping the system to shake the filters.

- First-stage impact separator with internal baffle plate to protect against abrasion.
- "Surface filtration" type filters, standard, and large main filter in a baghouse-type format.
- Inline filter protects both the operator and the vacuum

Vacuum huge quantities of fines continuously.

This little workhorse has filters that should last you five years and more. If you're tired of vacuums that need constant filter maintenance, then the Portable DVR is what you need.

Need more storage? The DVP industrial vacuum normally requires a pre-separator to collect bulk material. Contact us today to discuss.
